

Halcyan Water Conditioners

Re-defining mineral scale treatment, for a chemical-free future

Say goodbye to mineral scale. **Permanently.**

Say hello to the most sustainable, simple and powerful water conditioner on the market. It's chemical free and permanent, replacing water softeners, forever. *

*Subject to your system requirements.

The best solution available to tackle mineral scale

Looking for innovative, simple, environmentally-friendly water conditioners? Look no further.

The Halcyan Water Conditioner's revolutionary design means it's really easy to include in system plans, straightforward for installers and trouble-free for customers.

At a glance

- **Powerful, effective results**
- **Chemical and salt free**
- **No power required**
- **Quick and easy installation**
- **No maintenance, ever**
- **Complete range of sizes : 5 – 7000 lpm**
- **Minerals remain treated for 21 days**
- **10 year commercial warranty**
- **WRAS approved** , potable water
- **Works well with any water source**, especially borehole/groundwater

Halcyan helps you deliver better results

- **Prevents and reduces mineral scale** and other mineral deposits throughout your water systems
- **Dramatically reduces the lifecycle costs** of capital equipment and extends asset longevity
- **Reduces system downtime** with improved equipment reliability and efficiency
- **Improves efficiency** of irrigation equipment and efficacy of chemical additives (e.g. fertilisers and cleaning agents)
- **Saves money** by **reducing wasted energy consumption** from scaled heating elements
- **Inhibits growth of algae and bio-film** and **reduces habitat for bacteria** including Legionella
- **Eliminates the requirement for corrosive additives** to clean systems

Awards

We've been shortlisted for several environmental and innovation awards, including:

- Edie Sustainability Leaders Awards 2017 – Finalist for Sustainability Product Innovation: Energy
- Travis Perkins Innovation Awards 2016 – shortlisted
- Build It Awards 2016 – shortlisted
- RegenSW – delivering sustainable energy
- Wates Green Dragons Den competition, in conjunction with Smartspace, Standard Chartered, Barings Asset Management and the RFU.

We're supported by Entrepreneurial Spark, UKTI, Low Carbon Southwest, and the Innovate2Succeed programme.

Don't just take our word for it

"Since installing the Halcyan, there has not been any premature failure of the heating elements... We now offer Halcyan as a standard option to all our customers."

John Mangan, Operations Manager,
Edson Hot Water Systems

Edson Hot Water Systems supply commercial hot water systems throughout Australia, including to Coles supermarkets. When extreme hard water in coastal areas started causing a sharp increase in warranty claims on parts, they turned to Halcyan.

"The results were better than I'd hoped for. The stock showed no signs of calcium build-up or iron staining. The reps of the nursery were amazed at the quality I could produce with the quality of water I had. This unit saved me \$48,000."

Mr R. Eaton, Proprietor,
Canopy Wholesale Nursery

Irrigation water quality pumped from the borehole had very high salt and iron content which meant slow, stunted plant growth and discolouration. Shortly after installing Halcyan, the water quality significantly improved saving them money on imported water and improving plant health and growth rates.

Stops mineral scale build-up

Removes existing mineral scale

Chemical & salt free

Maintenance free

Permanent

Softens water

Tackling mineral scale head on

The Halcyan Water Conditioners' unique catalytic alloy core creates an immediate galvanic reaction in the minerals in hard water. This stops scale build-up by softening the water and removes existing scale.
