Plastics Manufacturer, Cooling Tower Report

Independent Plastics Pty Ltd
27 Dellamarta Road
Wangara, WA 6947

To Whom It May Concern

Independent Plastics installed a model 40122 Halcyan anti-scale system into the return line of our cooling tower on 22nd March 2002.

Prior to the installing the Halcyan unit we had experienced ongoing problems in relation to scale build-up in our cooling tower and associated piping. The extent of our scale build-up necessitated 'acid dosing' of our cooling water on a weekly basis.

Since the installation of the Halcyan anti-scale system over nine months ago there has been no build-up of scale in either our cooling tower or associated piping.

The Halcyan anti-scale system has proven extremely effective in preventing the build-up of scale and in breaking down pre-existing scale within our cooling system.

Regards

Ian Beaumont
