Halcyan Domestic Testimonials

I had the Halcyan water conditioner installed in May 2012. I can testify that within one or two weeks I noticed significant improvement in my water quality and this manifested itself in several ways.

I first noticed that I no longer had to use the same amount of shampoo, and eventually dispensed with conditioner altogether. I was aware of the soft texture of my hair, and that it became easier to manage.

There was a demonstrable change with my towels in as much as they had a softer pile and felt more luxurious than the ones laundered before the installation. My outlay for washing machine soap and conditioner has halved and since the installation I have not used any water softeners to protect the washing machine.

After nine months I eventually undertook the dreaded washing machine 'filter clean' and to my amazement found the filter and surrounding pipe work not only clean as new but odourless.

I no longer experience white water marks on the chrome taps in the bathroom and I am particularly pleased that these troublesome watermarks are no longer an eye sore on my 'brown' kitchen sink.

Last but not least I purchased a new kettle at the same time as the installation and one year on I still have no need or desire to have to de-scale it.

I have no hesitation in recommending the Halcyan water conditioner, and have no regrets at all that I invested in this product.

"It really works – good product"
(Regarding a shower unit)

Mr Richard E
Bristol
June 2015

"I have been very pleased with the quick results that I have seen after fitting the Halcyan Water Conditioner in my apartment. I've found that washing the dishes is much easier, as I use hardly any detergent now and the dishes clean very easily.

In the shower, in fact I am using a lot less soap, and my previously dry skin is now in excellent condition. I wasn't expecting this and it's been a real bonus.

I don't know how it performs in the washing machine as I use a communal facility but it has cleared out all the lime scale that had accumulated in my kitchen sink really quickly.

Lastly my new bathroom has stayed looking spick and span with no marks or accumulation of white crustiness.

I'm delighted with the Halcyan and the results after only a couple of months."

January 2014

"I tried soapy hands under tap at parents yesterday and was pleasantly surprised. Your system works a treat. Call me a cynic, but I was not 100% sure what to expect! I would certainly install the Halcyan instead of salt based softener in future."

Mr Andrew H

April 2015

"Expect Eden mentioned that the Halcyan has really kicked in now. Scale is slowly dissolving, showers seem cleaner and one of my daughters visiting from London said she noticed the difference when her head disappeared in bubbles!"

Mr Tony W
Redland, Bristol
April 2014

"I purchased a water softener because I couldn't bear the thought of all the lovely new taps and sanitary fittings that I fitted as part of an extension to my home, getting all scaled up. I chose the Halcyan because it was so simple, cost effective and required no maintenance. The unit has performed very well. The chrome fittings and glass shower door only require a weekly clean to keep them clear and shiny. Additionally, my son's eczema has almost cleared up and the water tastes better, benefits that I was not anticipating."

October 2014

"At last!! Had to wait some time for a plumber but device as you can see is now up and running. The kettle descaled within 3 to 4 days and the dishwasher no longer tarnishes cutlery. I don't think it will be long before other appliances which are not on mains supply will also be a "lot more healthier". Thanks for everything.

Mr John T
Braintree, Essex
July 2015

"Just a quick line to let you know about the water softener that Henning installed at the end of July. No real scientific evidence but have noticed that shampoo and soap last a lot longer, presumably foams better in the softer water, so using less. Also feeling far less itchy, think it is related to either the change in water or less soap. The kettle had a descaler device in that was really soapy to touch. Left it in place and now no longer soapy. The consistency of the deposit is now more grainy."

Bought to protect two new bathrooms. Looking good 2 years on. London water Bathroom installer sceptical.
" High priced piece of copper pipe?" I took a chance. No regrets over alternative salt things. It's not perfect like those but the lime scale just seems to rub off.
"Pleasure for effort ratio?": This device vs lugging heavy bags of salt/ third tap for drinking water/ external drainage
No contest. Recommend.

Good people to deal with when making initial investigation into product. Clear, precise and confident in their product. We live in a very hard water area and a water softener is essential.
This product is far superior to a softener in my opinion. Ease of installation, no footprint just cut out the appropriate length of pipe and replace with the Halcyan pipe.
No salt to be bothered with.
No worrying which taps have softened water and which don't Just drink from any tap. Installed in our new home and working for nearly three months. We are delighted with the decision to go Halcyan.
